

HAROLDO GOMES NOGUEIRA JÚNIOR

Technical Lead | Full Stack Developer | Insurance & Fintech Specialist | Technical Educator

✉ haroldognjunior@gmail.com | 📞 +55 66 99687 1611 | 📍 Brazil (GMT-3)

🔗 [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Technical Leader and Senior Full Stack Developer with 6+ years of professional development experience and 4+ years as technical educator, impacting 100+ students in career transitions. Expert in insurance platforms (GNP Seguros, Zurich) handling CFDI/SAT compliance, payment integrations (Mercado Pago), and regulatory requirements. Strong DevOps background with Kubernetes, Jenkins, and CI/CD automation. Demonstrated ability to integrate legacy systems (jQuery 1.9, IBM Portal) with modern architectures. Proven track record in performance optimization (60x improvement), complex webhooks orchestration, and team leadership (1-4 engineers). Experienced technical mentor and educator with passion for knowledge sharing and professional development. Bilingual (English/Spanish/Portuguese) with remote international collaboration experience. Specialized in React, Angular, Node.js, AWS, Kubernetes, and technical team leadership.

KEY ACHIEVEMENTS

- 👨‍🏫 Mentored 100+ students through career transitions as technical educator (4+ years) at Coder House, Desafio Latam, and Digital House, teaching Full Stack development (JavaScript, React, Node.js, SQL)
- 💰 Implemented end-to-end Mercado Pago integration for 12-month interest-free payment plans with complex webhook orchestration across multiple systems (TPAGO, Mercado Pago, Zurich)
- 📄 Developed CFDI (Mexican tax invoice) consultation and re-expedition platform ensuring SAT compliance with PDF/XML management and RFC modifications
- 🏠 Built insurance quotation and endorsement platforms for GNP Seguros with agent commission calculations (20/80 split) and policy management
- ⚙️ Configured production Kubernetes deployments (yaml, pods, namespaces) and Jenkins CI/CD pipelines for multi-environment insurance applications
- 🚀 Optimized backend query from 60 seconds to 1 second (6000% improvement) through pagination, refactoring, and database indexing
- 📊 Reduced SQL response time by 85% using batch processing, monitoring (Grafana, Elasticsearch), and architectural optimization
- 🔧 Engineered custom solutions for legacy systems (jQuery 1.9, IBM Portal) and proprietary web components (Zurich Design System) using native JavaScript
- 🎮 Architected AR-powered product customization platform processing 1,000+ quotations with real-time layered rendering
- 🏥 Developed hospital staffing marketplace automating physician-facility matching, reducing manual scheduling time by 70%

CORE COMPETENCIES

Technical Leadership: Team Leadership (1-4 engineers) • Mentorship • Code Reviews • Agile/Scrum • Sprint Planning • 1-on-1s
Education & Training: Technical Instruction • Curriculum Development • Student Mentorship • Career Guidance • 100+ Students
Frontend Development: React • Redux • Angular • TypeScript • Next.js • Gatsby • HTML5 • CSS3 • jQuery • Web Components
Backend Development: Node.js • NestJS • Express • Java/Spring Boot • REST APIs • GraphQL • Microservices • Webhooks
DevOps & CI/CD: Jenkins • Kubernetes (Yamls, Pods, Namespaces) • Docker • GitLab CI/CD • Deployment Automation

Cloud & Infrastructure: AWS (S3, Lambda, Cognito, CloudWatch) • Google Cloud Platform • Firebase • Azure
Databases: SQL • NoSQL • PostgreSQL • MySQL • Firestore • Query Optimization • Indexing • Pagination
Insurance/Fintech: CFDI/SAT Compliance • Policy Management • Quotations • Endorsements • Commission Calculations
Payment Systems: Mercado Pago • Payment Webhooks • TPAGO Middleware • 12 MSI • Stripe • Method
Testing & Quality: Jest • Unit Testing • Integration Testing • TDD • Code Reviews • Quality Assurance
Legacy Systems: jQuery 1.9 • IBM Portal • CORS Solutions • Token Management • System Modernization
Design Systems: Zurich Design System (ZDS) • Web Components • Native JavaScript • ISO Date Transformations

PROFESSIONAL EXPERIENCE

Full Stack Developer | *Amil (UnitedHealth Group Brazil)*

May 2026 – Present | Remote (Brazil)

- Developing AI-powered platform serving internal support agents and external customers for one of Brazil's largest health insurance companies (UnitedHealth Group)
- Building graph-based data architecture using Neo4j to map complex relationships between users, cases and service interactions enabling intelligent routing and recommendations
- Implementing AI-driven features to automate customer support workflows, classify requests and improve response accuracy
- Developing React frontend interfaces for internal agent dashboards and external client-facing self-service portals
- Tech Stack: React, TypeScript, MongoDB, Neo4j, Node.js, AI Integration

Technical Mentor & Instructor Coordinator (Freelance) | *Digital House*

May 2025 – Present | Remote (Part-time)

- Coordinate technology instructors for "Schools" platform delivering web development courses
- Guide curriculum development, teaching methodologies, and technical content quality assurance
- Conduct training sessions and provide ongoing technical support for educators
- Track instructor performance and student outcomes, continuously improving educational delivery

Technical Lead / Full Stack Developer | *NXTVIEW (Renewable Energy)*

Nov 2023 – Jan 2026 | Mexico City, Mexico

- Led cross-functional team of 3 engineers conducting daily stand-ups, sprint planning, code reviews, and 1-on-1 mentorship
- Architected zero-downtime platform modernization using reverse proxy (Node.js/TypeScript) enabling legacy-modern coexistence
- Achieved 60x performance improvement: optimized query from 60s to 1s through pagination, refactoring, and indexing
- Enhanced platform security by 40% implementing JWT authentication, encryption, and secure cookie management
- Owned CI/CD pipeline (GitLab, Jenkins, Docker, Nexus) improving deployment reliability by 30%
- Tech Stack: React, Angular, TypeScript, Node.js, NestJS, Java/Spring Boot, MySQL, GitLab CI/CD, Docker, Jenkins, JWT

Full Stack Developer - Insurance Platforms (Contract Roles) | *GNP Seguros & Zurich*

Dec 2023 – Dec 2025 | Mexico City, Mexico

Served as Frontend Technical Reference delivering concurrent full-stack solutions for two major insurance companies, handling CFDI/SAT compliance, payment integrations, legacy system modernization, and DevOps automation:

GNP Seguros (Dec 2023 - May 2025):

- Served as Frontend Technical Reference defining component architecture and technical standards across insurance projects
- Quotation Portal: Built dynamic system with customizable parameters (deductibles, co-payments, coverage), implementing 20/80 commission validation ensuring company profitability
- Endorsements Platform: Independently developed comprehensive policy modification system (RFC corrections, address updates) coordinating with backend team on secure integration strategies
- Legacy Integration: Successfully integrated React/Angular with IBM Portal (jQuery 1.9), implementing custom CORS solutions and token authentication for seamless modern-legacy communication
- Tech Stack: React, Angular, TypeScript, JavaScript, jQuery 1.9, IBM Portal, Nexus, Token Auth, CORS, Insurance Domain

Zurich Insurance (Apr 2025 - Dec 2025):

- Led frontend development as Technical Reference with 1 engineer direct report, coordinating work distribution and code reviews
- CFDI Platform: Developed Mexican tax invoice management system with multi-criteria search, PDF/XML visualization, email delivery, and re-expedition (RFC generic to specific conversion)
- Mercado Pago Integration: Independently implemented 12 MSI payment system orchestrating webhooks across TPAGO middleware, Mercado Pago, and Zurich systems with automated status notifications
- Kubernetes & CI/CD: Configured deployment manifests, created pods/namespaces, established security rules, managed Jenkins pipelines for multi-environment deployments
- Zurich Design System: Engineered custom solutions for proprietary web components using native JavaScript event handlers where framework integration was limited, built ISO date transformation utilities
- Tech Stack: Angular, React, TypeScript, Jenkins, Kubernetes, Docker, Web Components, ZDS, Mercado Pago API, Webhooks, TPAGO, CFDI/SAT

Technical Tutor & Mentor (Part-time) | *Desafío Latam*

Apr 2023 – Dec 2024 | Remote

- Mentored students through Full Stack Web Development bootcamp covering JavaScript, HTML, CSS, React, Node.js, and SQL
- Led hands-on coding sessions, facilitated breakout rooms for collaborative problem-solving, and provided personalized technical guidance
- Supported students in project presentations, assignment completion, and interview preparation for career transitions
- Contributed to curriculum improvements based on student feedback and industry best practices
- Tech Stack: JavaScript, HTML5, CSS3, React, Node.js, SQL, Full Stack Development, Bootcamp Education

Full Stack Developer (Frontend Reference) | *Pulpomatic*

Mar 2023 – Sep 2023 | Mexico City, Mexico

- Served as frontend technical reference establishing Angular best practices and code review processes
- Implemented hexagonal architecture backend with NestJS using domain-driven design principles
- Achieved 85% reduction in SQL query response time through refactoring and batch processing
- Designed AWS S3 pre-signed URL system for secure file uploads with automatic expiration
- Established monitoring infrastructure with Grafana, Elasticsearch, and AWS CloudWatch
- Tech Stack: Angular, NestJS, TypeScript, PostgreSQL, AWS (S3, CloudWatch, Lambda), Grafana, Elasticsearch

Technical Tutor & Mentor (Part-time) | Coder House

Dec 2020 – Mar 2023 | Remote (2+ years)

- Mentored 50+ students through web development fundamentals (JavaScript, HTML, CSS) facilitating successful career transitions into tech
- Designed and led interactive coding sessions using breakout rooms for peer collaboration and hands-on problem-solving
- Provided one-on-one guidance for project development, technical presentations, and assignment completion
- Witnessed and facilitated significant life changes: students securing dream jobs with better compensation and improved work-life balance
- Built supportive learning community fostering peer support and knowledge sharing beyond classroom hours
- Tech Stack: JavaScript, HTML5, CSS3, Web Development Fundamentals, Teaching & Mentorship

Full Stack Developer & Cross-Functional Team Lead | WRKS

May 2021 – Jan 2023 | Mexico City, Mexico

- Led cross-functional team of 4 (designers, content, business) as technical Product Owner
- Architected AR-powered product customization platform with real-time rendering processing 1,000+ quotations
- Built dual-backend: Firebase Functions (email/PDF/WhatsApp) + Java/Spring Boot (business logic/audit)
- Created self-manageable admin panel enabling non-technical stakeholders to update pricing, renders, and content
- Tech Stack: React, Redux, Gatsby, GraphQL, Firebase, Java/Spring Boot, Google Cloud, WhatsApp API, AR

Full Stack Developer (Remote - US Client) | Divelement

Mar 2022 – Nov 2022 | Remote (USA) - 100% English Communication

- Delivered 3 e-commerce projects for US clients with 100% English communication (requirements, stand-ups, discussions)
- Built React/Gatsby frontends integrating Shopify backend and Sanity CMS via GraphQL
- Implemented Stripe and Method payment processing with AWS Cognito authentication
- Achieved 90+ Lighthouse scores through code splitting, lazy loading, and optimization
- Tech Stack: React, Redux, Gatsby, GraphQL, Shopify, Sanity CMS, AWS (Cognito, Lambda), Stripe, Method

Full Stack Developer (Multiple Projects) | Capmega

Oct 2020 – Apr 2021 | Mexico City, Mexico

- Delivered 3 distinct enterprise applications demonstrating full-stack versatility:
- Hospital Staffing Marketplace (React + Azure): Two-sided platform connecting freelance physicians with hospitals, automating shift management and reducing scheduling time by 70%
- Property Management Platform (Ruby + JavaScript): Real-estate broker platform with real-time chat system and calendar-based amenity reservations using Gatsby + WordPress
- Enterprise Application (React + Azure SQL): Full-stack app with TypeScript, Redux state management, and robust authentication flows
- Tech Stack: React, Redux, TypeScript, Gatsby, Ruby, JavaScript, Azure, WordPress, SQL, Node.js, WebSockets

Full Stack Developer | BBVA

Aug 2021 – Dec 2021 | Mexico City, Mexico

- Developed e-learning platform for banking client using React and Redux for state management
- Implemented admin panel with Crema Theme for content management and user administration
- Integrated frontend with Sequelize ORM for SQL interactions and AWS Lambda for serverless functions
- Tech Stack: React, Redux, WordPress, SQL (SQLite), AWS Lambda, Sequelize, Crema Theme, Banking/E-learning

Full Stack Developer (IoT & Data Analytics) | @Tech

Oct 2020 – Dec 2020 | Remote (Brazil)

- Developed IoT-enabled livestock management platform with real-time weight tracking and predictive analytics
- Built internal integration API using NestJS connecting IT systems with Data Science team
- Implemented GraphQL API layer consumed by React frontend for efficient data fetching
- Created data visualization dashboards displaying livestock metrics using Redux for state management
- Developed predictive algorithms analyzing weight gain patterns to determine optimal processing dates
- Tech Stack: React, Redux, NestJS, GraphQL, Node.js, Data Visualization, IoT Integration

Full Stack Developer (Volunteer Project) | ONG Sarmiento

Sep 2020 – Oct 2020 | Remote (Argentina)

- Developed full-stack application for animal rescue non-profit enabling donation collection, volunteer registration, and pet adoption workflows
- Built frontend with React and Redux integrating Firebase for authentication, database, and cloud storage
- Implemented virtual wallet integration for secure donation processing
- Tech Stack: React, Redux, Firebase (Auth, Firestore, Storage), Payment Integration

Full Stack Developer (Bootcamp Capstone) | Henry Bootcamp

Jun 2020 – Aug 2020 | Remote (Argentina)

- Developed PayPal-like virtual wallet and e-commerce platform as intensive bootcamp capstone following Agile/Scrum
- Implemented secure payment processing with transaction management, balance tracking, and transfer workflows
- Built security layers including encryption, authentication, authorization, and fraud prevention
- Collaborated in Scrum team with daily stand-ups, sprint planning, and retrospectives under SCRUM Master guidance
- Tech Stack: JavaScript, Node.js, React, Redux, PostgreSQL, Express.js, Sequelize, Bootstrap, Ajax

Software Developer (Junior) | Accenture

Aug 2016 – Oct 2019 | Buenos Aires, Argentina

- Supported software development teams with code review, system maintenance and quality assurance processes
- Participated in web development projects working with HTML, CSS and JavaScript, reviewing security rules and application logic
- Gained foundational experience in enterprise software environments, contributing to code inspection and system monitoring
- Tech Stack: HTML, CSS, JavaScript, Security Review, Code Inspection, Enterprise Systems

TECHNICAL EXPERTISE BY EXPERIENCE LEVEL

6+ years: JavaScript, TypeScript, HTML5, CSS3, React, Redux, Node.js, SQL, NoSQL, Git/GitHub

5+ years: Angular, Java/Spring Boot, NestJS, Next.js, Gatsby, GraphQL, AWS, Firebase, GCP

4+ years: Technical Leadership, Team Leadership, Mentorship, Code Reviews, Agile/Scrum, Technical Education

3+ years: PostgreSQL, MySQL, Docker, GitLab CI/CD, Performance Optimization

2+ years: Insurance Platforms, CFDI/SAT, Payment Integration, Kubernetes, Jenkins, Mercado Pago, Webhooks

EDUCATION & PROFESSIONAL DEVELOPMENT

Java Full Stack Developer | *CODO A CODO* / Feb 2024 – Jul 2024 | Argentina

Django Full Stack | *CODO A CODO* / Jul 2023 – Dec 2023 | Argentina

Python Full Stack Developer | *CODO A CODO* / Mar 2023 – Jun 2023 | Argentina

Programming Career Degree | *TECLAB* / Feb 2020 – Dec 2021 | Argentina

Full Stack Web Developer Bootcamp | *Henry* / Apr 2020 – Aug 2020 | Argentina

UX/UI Design | *Coderhouse* / Apr 2020 – Jul 2020 | Argentina

CERTIFICATIONS & TRAINING

Professional AI Development (Corsiv, 2026) • Advanced JavaScript (Talently, 2025) • AWS Cloud Services (Talently, 2024) • TypeScript (Talently, 2024) • Backend JavaScript (Talently, 2024) • English B2 Communication Skills (SmallTalk2Me, 2023) • English Language Program (Fluency Academy, 2020) • Java (Educación IT, 2020) • JavaScript (Educación IT, 2020) • Python (Educación IT, 2020) • Linux (Educación IT, 2020) • Oracle (Educación IT, 2020) • Web Programming (Educación IT, 2020) • Project Management (Educación IT, 2020) • Information Security (Educación IT, 2020) • Sensitive Information Security in the Workplace (Accenture, 2018)
