Senior Full Stack Developer | Frontend Lead | Tech-Oriented Leader with 6+ years of experience designing and scaling web platforms using React, Angular, Node.js and cloud services. Strong background leading small cross-functional teams, acting as frontend reference and technical mentor, modernizing legacy systems, and delivering high-impact solutions for insurance, fintech and e-commerce platforms across Latin America and the US. Experienced in AI-assisted development to optimize delivery, CI/CD workflows, and technical problem solving.

TECHNICAL SKILLS

- ✓ **Frontend:** ReactJS, Redux, Angular, NextJS, Gatsby, TypeScript, HTML, CSS, SASS, JQUERY.
- ✓ **Backend:** Node.js, NestJS, Spring Boot, Java 8, Firebase Functions, GraphQL.
- ✓ **Databases:** SQL, NoSQL, MySQL, PostgreSQL.
- ✓ **DevOps & Tools:** GitLab CI/CD, Docker, AWS (S3, Lambda), Google Cloud, Grafana.

EDUCATION

- ✓ CODO A CODO – JAVA FULLSTACK / FEB 2024 – JUL 2024 - Argentina
- ✓ CODO A CODO – DJANGO / JUL 2023 – DEC 2023 - Argentina
- ✓ CODO A CODO – PYTHON FULLSTACK / MAR 2023 – JUN 2023 - Argentina
- ✓ TECLAB - PROGRAMMING CAREER / FEB 2020 – DEC 2021 - Argentina
- ✓ HENRY - FULLSTACK WEB DEVELOPER / APR 2020 – AUG 2020 – Argentina
- ✓ CODERHOUSE - DESIGNER UX/UI / APR 2020 – JUL 2020 – Argentina

EXPERIENCE

- ✓ +13 years – JavaScript, CSS, HTML
- ✓ +6 years – Nodejs, Redux, ReactJS, SQL, NoSQL, TypeScript, Google Cloud
- ✓ +5 years – Angular, Java, Spring Boot, NestJS, NextJS, Gatsby, GraphQL, AWS
- ✓ +4 years - leading small technical teams across frontend, backend, design, content and business roles.

NOV 2023 – JAN 2026

Full Stack Developer

NXTVIEW - Mexico

- ✓ Hands-on technical lead of a 3-person team (2 developers, 1 designer/content), actively contributing to frontend and backend development while coordinating architecture decisions, task planning, and code reviews.
- ✓ Led frontend development using Angular and React/TypeScript, defining component architecture, state management, authentication flows, and API integrations with Java and Node.js backends.
- ✓ Drove platform modernization through a proxy-based architecture, enabling the new backend and database to coexist with legacy systems without production downtime.
- ✓ Developed and migrated backend services from Java 8 (Spring Boot) to Node.js/NestJS, implementing REST APIs, business logic, and optimized SQL/MySQL integrations.
- ✓ Strengthened platform security by implementing JWT authentication, encryption strategies, secure cookies and frontend interceptors.
- ✓ Owned CI/CD pipelines using GitLab, Jenkins, Docker, and Nexus, improving deployment reliability and release consistency.
- ✓ Maintained and upgraded legacy Android applications, ensuring compatibility through SDK updates,

dependency fixes, and Gradle adjustments.

- ✓ Applied AI-assisted development to support DevOps workflows, CI/CD pipeline implementation, automation scripts, and technical troubleshooting, accelerating delivery and reducing errors.

MAR 2023 – SEP 2023

Full Stack Developer

Pulpomatic - Mexico

- ✓ **Frontend** reference for the team, defining best practices, component architecture and Angular development standards.
- ✓ **Frontend development with Angular:** I used Angular in the frontend to manage component states and integrate them seamlessly with backend strategies, such as pre-signing a file for expiration using AWS S3.
- ✓ **Backend development with NestJS:** On the backend, I implemented a hexagonal architecture using NestJS with an SQL database. I refactored the backend code, resulting in an 85% reduction in SQL query response time, which we monitored using tools like Grafana and AWS logs for each service.
- ✓ **6 months of experience in NestJS, Angular, AWS, JEST, NodeJS, and GitHub:** Throughout this period, I worked on both frontend and backend, incorporating AWS services, writing tests with Jest, and managing the project with GitHub.

MAY 2021 – JAN 2023

Full Stack Developer

WRKS - Mexico

- ✓ **Led** a cross-functional team of 4 people (developer, designer, content specialist, and business stakeholder), aligning technical solutions with business needs.
- ✓ **Frontend development with ReactJS, Redux, GraphQL, and Gatsby:** The frontend was developed using React, combined with Gatsby to ensure high-quality images across various device screens. Redux was used to manage component states, which was crucial throughout the process. At the end of the process, a PDF was generated, sent to the user's email, and stored in the database, capturing all component state information.
- ✓ **Backend 1 development with Firebase:** Firebase Functions in JavaScript were used to handle sending emails, generating and storing PDFs, and initiating WhatsApp conversations related to the generated quotations.
- ✓ **Backend 2 development with Java (spring boot):** Developed the logic for consuming and recording information related to logs and sensitive business and client data. This involved creating RESTful APIs for data retrieval and management, implementing robust security measures to protect sensitive information, and ensuring compliance with data protection regulations. Additionally, optimized the database interactions for efficient data storage and retrieval, facilitating better tracking of system performance and client interactions. The solution was designed to be scalable and maintainable, allowing for future enhancements and integration with other services.
- ✓ **API and functions integrations with Google Cloud:** Integrated Google Cloud services for various backend functionalities (NodeJS).
- ✓ **2 years of experience in NodeJS, Gatsby, Google Cloud, ReactJS, Firebase, NoSQL, and GitHub:** This experience involved managing frontend states, handling non-relational database logic to reference and locate documents, enabling email resending, displaying data to authorized users, and allowing administrators to delete files as needed.

MAR 2022 – NOV 2022

Full Stack Developer

Divelement - USA

- ✓ **Frontend development with ReactJS, Redux, GraphQL, and Gatsby:** Gatsby was used to ensure image quality across various products. ReactJS, along with Redux, managed component states and consumed data from the backend, which utilized Shopify and Sanity.
- ✓ **Backend development with Shopify and Sanity:** The backend relied on Shopify for product management and Sanity for content, providing the necessary data to the frontend.
- ✓ **API and functions integrations with AWS, Method, and Stripe:** For payment processing, Method and Stripe were integrated using AWS Incognito along with other APIs.

- ✓ **6 months of experience in NodeJS, Gatsby, ReactJS, AWS, and GitHub:** This period involved building a robust frontend, consuming backend services, and securely handling payment integrations.

AUG 2021 – DEC 2021

Full Stack Developer

Dedica - Mexico

- ✓ **Frontend development with ReactJS and Redux for an e-learning platform:** Developed the frontend for a bank client's e-learning platform using ReactJS and Redux for state management.
- ✓ **Admin panel with Crema Theme:** Implemented an admin panel using the Crema Theme for managing platform content and user interactions.
- ✓ **Integration with backend using Sequelize/SQL and AWS/Lambda:** Integrated the frontend with the backend, utilizing Sequelize for SQL database interactions and AWS Lambda for serverless functions.
- ✓ **3 months of experience:** This experience involved building a dynamic learning platform, creating an admin interface, and managing integrations with various backend services.

OCT 2020 – DEC 2020

Full Stack Developer

@Tech - Brazil

- ✓ Internal integration API development (data shared between IT and Data Science) in NestJS.
- ✓ Back-end application development.
- ✓ GraphQL use to build routes that will be consumed by the application.
- ✓ Front-end application development in React.
- ✓ Consume and control API data to populate application graphs and tables (use of Redux).
- ✓ Develop table interface.
- ✓ Develop graphics interface.

OCT 2020 – APR 2021

Full Stack Developer

Capmega - Mexico

- ✓ **Full Stack Developer - TypeScript, Gatsby, JavaScript, Ruby, Node.js:** Worked on two distinct projects:
 1. **Project 1:** Utilized React and Redux to manage component states, consuming data from an SQL database and integrating Azure services. TypeScript was used to ensure robust and type-safe code.
 2. **Project 2:** Used Ruby for the backend, incorporating JavaScript events to handle notifications and a chat feature between users. Also implemented a calendar system for space reservations. The frontend was built with Gatsby and React to manage component states effectively.

SEP 2020 – OCT 2020

Full Stack Developer

ONG Sarmiento - Argentina

- ✓ App Development for ONG providing information to the public and being able to collect donations, inputs, to be volunteers and people who wants to adopt the rescued animals as pets.
- ✓ React redux and libraries use in frontend. Firebase connected through redux and integrations for storage and virtual wallet for donations.

JUN 2020 – AUG 2020

Full Stack Developer

Henry - Argentina

- ✓ E-commerce and digital wallet development with better code and practices.
- ✓ SCRUM use with current daily with SCRUM Master.
- ✓ Tolerance to frustration development.
- ✓ Use with: JavaScript, NodeJS, Ajax, DOM, HTML, CSS, JSON, Reactjs, Redux, Github,
- ✓ PostgreSQL, Bootstrap, Redux, Expressjs, Sequelize.

LANGUAGES

- ✓ Spanish and Portuguese – Advanced
- ✓ English – Intermediate B2

TRAININGS

- ✓ **Professional Use of Artificial Intelligence** – Corsiv, 2026
- ✓ **JavaScript** — Talently, 2025
- ✓ **AWS** — Talently, 2024
- ✓ **JavaScript Back-End** — Talently, 2024
- ✓ **TypeScript** — Talently, 2024
- ✓ **English Communication Skills Assessment** — SmallTalk2Me, 2023
- ✓ **English Language Program** — Fluency Academy, 2020
